Subsidy without a doubt

Subsidy experts

Subsidies are a great way to (better) achieve business goals. There are numerous wage subsidies for many different activities, but it remains a complex phenomenon for many payroll administrators, accountants and business owners.

As of 2018, the Wage Cost Benefits (LKV) scheme was introduced, whereby tax benefits on personnel can no longer be applied for retroactively. The scheme states that submitting the application must be fully completed within 3 months after the employment of the employee. In addition, no questions may be asked during the probationary period about the employee's employment history. The time to submit the application is therefore extremely limited, and if you are late you will not receive anything at all.

To ensure that we can obtain all the benefits and schemes for you, we use the expertise of Mijnsubsidie. Mijnsubsidie continuously maps out subsidy options

through a software link with our salary package.

This means that we are always aware of the latest developments in the field of subsidies and, with an automated scan, no subsidy can be missed.

What does this mean for you?

Using the Mijnsubsidie software, we send every new employee a short online questionnaire tailored to them. Based on this subsidy scan, it will become apparent whether a(n) (new) employee within your organisation is eligible for subsidy. We collect the required documents and submit the application. With the Mijnsubsidie software link, we can be sure you will not be paying too much in wage tax.

Roadmap

The subsidy scan shows that a subsidy has been found within your company!

We are happy to get to work on it, but how do we go about it?

1. Subsidy scan

Every new employee receives a subsidy scan from us.

2. Completing the scan

The employee completes the scan upon receipt.

3. Tax authorities and UWV

We submit the forms to the tax authorities and the UWV.

4. Preliminary indication

The tax authorities will indicate the amount of the subsidy.

5. Sharing of preliminary indication

We share this information with you.

6. Subsidy received

The requested subsidy will be paid.

7. Invoices

We have made an agreement on how this service will be charged.

8. Scan new subsidies

The software continues to scan in the background for new subsidies. If a new subsidy is found, this process will be repeated.
